MANY TRAINERS MISUNDERSTAND THE USE OF THE E-COLLAR IN MODERN DOG TRAINING.

Why an increasing amount of people say,

'E-collars are one of the greatest dog training tools ever invented' versus **'How they are also one of the most abused.'**

An intensive one day course, covering the science, research, practical applications, demonstrations, the good, the bad and detailed explanations behind this highly controversial tool. A highly controversial training tool, banned in Wales and several other European countries. This course explains the 'myth' behind e-collars and helps trainers develop a clear understanding of the proper use and things to look out for if considering the use of such a training tool.

Beginners, dog owners & experienced trainers welcome.

Students are welcome to bring dog(s) to train with, but this is NOT a requirement. Aggressive dogs ARE welcomed here, but please let us know in advance!

WHY DO WE RUN THESE E-COLLAR COURSES?

To educate dog trainers and dog owners of the advancement by technology in dog training. We are not against them and we do not actively advocate the use of them by novice handlers. We do not try to encourage the use of the e-collar, however, nor would we like to see this training tool banned. Hundreds of thousands of people in the UK alone, claim extraordinary results. Yet 99% of average pet dog trainers in the UK (and pet owners) know very little about how to use these devices properly. We simply show you how these devices work, how the 1% has achieved their results and show you whether or not this device has the validity to remain in the 'dog trainer's toolbox'. Then, you can make the choice, opinion or choose to use them by yourself.
